PREFACE

In the name of Allah, the beneficent and merciful. All praise is merely to the Mightiest Allah SWT, the Lord of the worlds, for the gracious mercy and blessing that enable me to accomplish this thesis. This thesis entitled “The Correlation Between Illness Perception and Self-care Management in Type 2 Diabetes Mellitus Patients in The Working Area of Kabat Public Health Center Banyuwangi in 2023” is submitted to fulfil one of the requirements in accomplishing the Bachelor of Nursing Degree at STIKES Banyuwangi.

There are many people who have helped the researcher in completing this thesis. First of all, the researcher would like to express her sincere gratitude and respect to:

1. DR. H. Soekardjo, as a chairman of STIKES Banyuwangi who has provided the opportunity and facilities for me to attend and complete the education in Bachelor of Nursing Sciences Study Program at STIKES Banyuwangi.
2. Ns. Sholihin, M. Kep as the Head of the Bachelor of Nursing Sciences Study Program at STIKES Banyuwangi.
3. The first advisor Ns. Anita Dwi Ariyani, M. Kep and the second advisor Ns. Badrul Munif, M. Kep who have contributed and given their valuable evaluations, comments, and suggestions during the accomplishing of this thesis. My Allah blessed your life, aamiin.
4. The mentor of writing thesis in English, Ns. Masroni, M. Kep, M. S. N. I'm really thankful because of all of his push, his attention, his guide, I can finish my thesis as best as I can. May Allah always guide, and light your way, aamiin.
5. The mentor in English Club, Mr. Muhammad Nashir, M. Pd, Mrs. Roudlotun Nurul Aini, M. Pd, Mrs. Wahyu Adri Wirawati, M. A, who have always push me to improve my English since day one I became a student in STIKES Banyuwangi.
6. The Head of Kabat Public Health Center, all nurses and other health professionals who have always helped the researcher in obtaining information related to the research.

7. My beloved parents, my beloved grandparents, my uncle Iqbal Goval and his family, my brother Naufal Anfal and his family, and my sweet sister Bintang Muslimah who have given love, and pray also support both morally and materially. May Allah SWT give you a peaceful and happy life both in this world and in the hereafter.
8. I'm really thankful for myself because no matter how big problem that I've faced, I keep survive and finish this thesis with the help of the great people around me. I hope I can always be the light for people around me, aamiin.
9. Miss Ns. Rima Ambarwati, S. Kep who have always helped me to find out ideas and helped me in making a decision in the process of this thesis. You really deserve a happy life.
10. All my buddies, especially Adisty, Ajeng, Bella, Derisca, Failam, Shinta, Rima, Nora, Imelda, Dimas Ainur, and EOTW group who have always be a place for me to sharing about this thesis, be a solution and always accompany me to finish this thesis.
11. Faldycr who always give a support, a lot of attention, and always lend his hand so the researcher can finish this thesis. I hope both of us can be the light for people around us.
12. All of my classmate from Bachelor of Nursing Sciences Study Program AMAN of 2019 and all those who have contributed greatly in this study that cannot be mentioned by the researcher one by one.

May the almightiest Allah SWT return the favor to all those who have provide support, assistance, and opportunities in completing this thesis. The researcher is fully aware that the writing of this thesis still far from perfection, so the researcher begs for critic and suggestions that are constructive. The researcher hopes that this proposal can be useful for readers and the world of nursing.

Type 2 DM is a chronic disease that need a self-care management to prevent the complications. Illness perception is one of the factors that affecting self-care management in type 2 DM patients. This study aimed to determine the correlation between illness perception and self-care management in type 2 DM patients at the working area of Kabat Public Health Center Banyuwangi in 2023.

This research used cross sectional design with 76 respondents who were selected by using accidental sampling technique. Data collection used was Brief Illness Perceptions Questionnaire (BIPQ) and Summary Diabetes Self Care Activities (SDSCA) – Revised. For the analysis test used SPSS version 16.

The results of data analysis showed the highest score of IP dimension was treatment control with the score of 7.93. The lowest score was timeline with the score of 8.3. The highest score of SCM in type 2 DM patients was diet management with the score of 23.7. The lowest mean score was blood glucose monitoring with the score of 1.43. The study used Pearson Product Moment test and it showed that P-value was 0.003, it means there was correlation between illness perception and self-care management in type 2 DM patients and the strength of the correlations (r) was 0.335.

Therefore, it is very important to increase the illness perception to achieve good self-care management in type 2 DM patients. The nurses should consider these aspects in providing the care to type 2 DM patients.

Keywords: Type 2 DM, Illness Perception, Self-care Management
